Murali Krishna Nanda Kumar

Head of Product and Design | Designs in Code | Fintech and Legal AI | MBA Finance
kishan.krishna.jb@gmail.com | m-krishna.com | linkedin.com/in/murali-krishna-b7268544 | Dublin, Ireland | Stamp 1G from January 2027

PROFILE

Head of Product and Design with 12 years of experience building AI-native products in high-stakes environments including fintech, legal tech, and enterprise B2B SaaS. I own the full product cycle: discovery, PRD, prototype, user interviews, and implementation. I build working prototypes in Claude, iterate on staging via Codex, and push branches directly to Git for engineering review, closing the gap between product intent and production code without handoff delays. At Pazy.io I took CFO activation from 12% to 68% in 8 weeks by redesigning how finance leaders interact with AI-parsed data. At CoinDCX I led design through a 1-to-10 growth journey for India's largest crypto unicorn, designing for 20M+ users. Currently Head of Product and Design at EstateMin, building the AI document review trust layer for US probate law firms. MBA Finance, Dublin Business School (Jan 2026 to Jan 2027).

AI-NATIVE PRODUCT WORKFLOW

Pipeline 1 (Build new features):
Discovery to PRD to Prototype in Claude to Docker to Git to Codex to Branch to Engineering review to Production

Pipeline 2 (Iterate on staging):
Docker to Git to Codex to Branch off main to Staging changes to Commit to PR to Preview link to Dev push to prod

One person. One motion. Full ownership from problem to production. No handoff. No translation loss.

EXPERIENCE

Head of Product and Design | **EstateMin** | *Jun 2026 to Present* | *Dublin, Ireland*
AI-native estate administration platform for US probate law firms. 50+ law firm clients across the United States.

- Own the full product development cycle using the AI-native pipeline above. Build prototypes in Claude, iterate via Codex on staging, push branches to Git for engineering review and production push
- Define and track OKRs across product and design with metrics covering client activation rate, time-to-complete-a-matter, and support ticket reduction
- Designing the AI document review trust layer: passage-level confidence scoring, maker-checker approval flow, conflict detection, and audit trail for AI-generated legal documents filed to US courts
- Building the EstateMin design system and component library from scratch in Figma, aligned to the engineering codebase
- Leading hiring for product and design function as the team scales toward Series A
- Working directly with founders on product strategy, roadmap prioritisation, and investor narrative

Head of Design, Founding Team | **Pazy.io** | *Feb 2025 to Jan 2026* | Bangalore, India
AI-native spend management platform. Accounts Payable, Connected Banking, Reimbursements, and Procurement in one integrated OS for finance teams.

- Increased CFO activation from 12% to 68% in 8 weeks through Progressive Trust Methodology: redesigning how finance leaders review and approve AI-parsed invoice data with confidence-state indicators and human override flows
- Built LLM-based invoice parsing UI achieving 99%+ accuracy on financial document digitisation across handwritten, multi-format, and edge-case invoices
- Led end-to-end product cycle across Procurement, Reimbursements, Connected Banking, and UPI modules from discovery through to production
- Grew and managed the design team through hiring, mentoring, and establishing design practice and processes
- Drove strong month-on-month ARR and payment volume growth. Opened payment APIs for high-volume fintech customers, winning against established competitors on connected banking and ERP-write capabilities

Design Lead, AI Innovation | **Accenture, The Dock** | *Sept 2024 to Jan 2025* | *Dublin, Ireland*
Accenture's global R&D and innovation hub. AI experience design for enterprise industries.

- Designed AI-native experiences for enterprise clients across financial services, healthcare, and technology
- Applied human-centred AI principles to complex enterprise workflows requiring high human trust, oversight, and regulatory compliance
- Built explainability and trust frameworks into AI interfaces alongside research scientists and ML engineers

Lead Product Designer | **CoinDCX / Okto.tech** | *Jul 2023 to Jun 2024* | *Remote / India*
India's largest crypto exchange and Web3 wallet platform. 20M+ users. Unicorn at $2.5B valuation.

- Led design for CoinDCX's 1-to-10 growth journey working directly with founders on product vision, strategy, and design system
- Drove Okto Web3 wallet activation from 45% to 72% with 2M+ users in 6 months through simplified DeFi and CeFi journeys

- Designed trading interface handling $1B+ in cumulative transaction volume
- Built design system adopted across 8 product teams, cutting design-to-engineering handoff time by 50%
- Drove mobile app to number 1 in Finance on iOS and Android in India

Senior Product Designer | **Fulfil.io** | *Feb 2022 to Jun 2023* | *Remote / Dublin*
Enterprise ERP and WMS platform for DTC brands. Backed by US investors.

- Redesigned pick-pack-ship workflows, inventory management, and mobile warehouse flows delivering 25x ROI for merchants within the first year
- Designed enterprise software serving DTC brands processing millions of orders, making B2B complexity feel as fluid as a consumer app
- Sole designer in a cross-functional team, owning design end to end from discovery to production

Senior UX Designer | **Mindtree (Now LTIMindtree)** | *Aug 2017 to Jan 2022* | *Bangalore, India*
Global technology consultancy. $3B revenue. 35,000+ employees.

- Led service design across multiple enterprise client engagements in financial services, retail, and social impact
- Built MIRI with UNDP: AI-powered digital financial platform increasing income of 200,000+ farmers in rural Karnataka by up to 3x
- UX Lead for Mindtree.org: digital platforms addressing social and environmental challenges globally

Product Designer | **HackerEarth** | *Sept 2014 to Jan 2016* | *Bangalore, India*
Developer hiring and hackathon platform. 2M+ users. 750+ enterprise clients.

- Sole designer responsible for all product design, visual design, and growth campaigns
- Contributed to acquiring 2M+ users and 750+ enterprise clients including Walmart Labs, Amazon, Barclays, Mercedes-Benz, and GE

Customer Support and Sales | **HSBC** | *2008 to 2010* | *Bangalore, India*
UK retail banking. Phone banking division.

- Handled inbound sales and customer support for UK retail banking customers. Consistently hit sales targets and won the Wall of Fame award, the most prestigious performance recognition in the division

EDUCATION

MBA Finance | **Dublin Business School** | *Jan 2026 to Jan 2027* | *Dublin, Ireland*
Corporate Financial Management, Global Financial Markets, Research Methods, Strategy, Dynamic Leadership. Semester 1: First Class Honours.

Professional Diploma, Game Art and Design | **Asian Institute of Gaming and Animation** | *2012 to 2013* | *Bangalore, India*

Bachelor of Commerce | **Bangalore University** | *2005 to 2008* | *Bangalore, India*

SKILLS

Product and Design Discovery, PRD, Roadmap, OKRs, User Research, Jobs-to-be-Done, Design Systems, Service Design, Information Architecture, Prototyping, Agile/Scrum

AI and Code Claude Code, Codex, Cursor, v0, Figma Make, Docker, Git, GitHub PRs. Full prototype-to-production workflow without engineering handoff

Tools Figma, Framer, Notion, Linear, Jira, SPSS, Excel, Google Analytics, Mixpanel, Hotjar

Finance Financial Modelling, Corporate Finance, Equity Valuation, Derivatives, MBA Finance (DBS 2026 to 2027)

Domains Fintech, Legal Tech, Web3 and Crypto, Enterprise ERP, B2B SaaS, Payments, Regulated Products, Healthcare Data

ADDITIONAL

Community Dogpatch Labs Dublin, active in the Irish fintech and AI startup ecosystem

Angel Investor 2 early-stage B2B SaaS and fintech startups

Speaker/Mentor Colleges, meetups, events
